Senior Security Engineer — Detection & Response

Senior detection engineer with 10+ years building SIEM detection content, security logging pipelines, and incident-response support across nine SIEM/EDR platforms. Hands-on with AWS cloud security, endpoint telemetry (CrowdStrike, SentinelOne), and Python automation; currently support live SOC incident response for a federal team.

CORE SKILLS

Security Operations & Detection: SIEM detection engineering and alerting across Splunk, Elasticsearch/ELK, CrowdStrike, SentinelOne, Microsoft Sentinel/Defender, Google SecOps, Sumo Logic, Palo Alto XSIAM, Devo; incident detection, triage, and investigation support

Cloud & Infrastructure Security: AWS, GCP, Azure cloud security; Docker for reproducible detection-testing environments; GitLab CI/CD for detection-as-code delivery

Automation & Scripting: Python, SQL; GenAI-powered triage automation; MITRE ATT&CK coverage mapping

Data Engineering: 220+ log-source ingestion pipelines, log parsing/normalization/enrichment, Common Information Model design, data-quality monitoring and alerting

PROFESSIONAL EXPERIENCE

Senior Security Engineer — Shorepoint

Oct 2023 – Present

- Treasury SOC (TSSOC), Threat & Research team — own the detection and alerting content (Splunk saved searches) the SOC runs day-to-day incident response against; support security incident and case investigations.
- DOE/NNSA Security Data Integration (completed): built a new security data platform ingesting CrowdStrike, Suricata, and Zeek into Elasticsearch, plus custom dashboards, UEBA detection content, and data-quality monitoring/alerting on top.
- CISA CDM at DOE (completed): data ingestion and quality work across a combined Elasticsearch and Splunk environment.

Senior Threat Detection Engineer & Data Scientist — Forescout

Aug 2022 – Oct 2023

- Senior member of the detection engineering/data science team building signature, behavioral, statistical, time-series, and ML-based detection content against cloud-scale customer data.

Threat Detection Engineer & Data Scientist — Trend Micro / Cysiv

Sep 2018 – Aug 2022

- Built detection-as-code orchestration across nine SIEM/EDR platforms — including CrowdStrike and SentinelOne — via native APIs, run through a full GitLab CI/CD pipeline.
- Created and managed 2,300+ detection rules covering most of the MITRE ATT&CK matrix; 50+ data filters for parsing and normalization across 220+ log sources.
- Used Docker to build reproducible detection-testing environments for validating content against real log data.

Security Data Scientist — Experian

Jan 2015 – Jan 2018

- Built DNS-based detection and mitigation for malware infections; analyzed large-scale security log data to surface anomalous behavior.

EDUCATION & CERTIFICATIONS

M.S. Physics — University of North Texas (2013) | B.S. Physics — Ball State University (2011)

Splunk User Certification · Splunk for Analytics and Data Science

Detection Response Hiring Team

Vercel

Keeping security visibility and logging infrastructure trustworthy — so alerts mean something when they fire — is work I've done across federal and commercial SOC's for the past decade.

At Trend Micro/Cysiv, I built detection-as-code orchestration across nine SIEM and EDR platforms, including CrowdStrike and SentinelOne, through their native APIs, run through a full GitLab CI/CD pipeline, and created and managed 2,300+ detection rules covering most of the MITRE ATT&CK matrix. I also built the telemetry layer itself: 50+ parsing/normalization filters across 220+ log sources, keeping signal quality high enough to act on.

Currently at Shorepoint, I own the detection and alerting content Treasury's SOC runs incident response against, working hands-on with AWS cloud security and endpoint telemetry to support live investigations and harden internal security posture.

I'd welcome the chance to talk through how that background fits Vercel's CorpSec and detection roadmap.
