Staff Security Engineer, Security Operations

Detection and incident-response engineer who builds the automation, not just the runbooks: a Python-based orchestration framework across nine SIEM/EDR platforms, production GenAI tooling for detection triage and content generation, and live SOC incident support. Comfortable owning detection logic end to end — from telemetry pipeline through shipped detection to incident investigation and mentoring.

CORE SKILLS

Detection Engineering & Incident Response: Created and managed 2,300+ detection rules covering most of the MITRE ATT&CK matrix; signature, statistical, behavioral, and ML-based detection content; analytically supports a live SOC's case/incident queue (Treasury SOC), building content informed directly by threat intel rather than passively consuming feeds

AI-Assisted Security Engineering: Production GenAI tooling for false-positive triage and automated detection-content generation/cross-platform rule conversion; built and validated these AI-assisted workflows against real analyst judgment before trusting the output; reusable GenAI-powered "skills" for detection engineers

Security Automation at Scale: Python-based detection-as-code orchestration across nine SIEM/EDR platforms via native APIs (Microsoft Sentinel, Microsoft Defender, Google SecOps/Chronicle, Splunk, CrowdStrike, SentinelOne, Sumo Logic, Palo Alto XSIAM, Devo); full GitLab CI/CD pipeline with automated tests, staged rollout, and tracked coverage/precision/false-positive-rate metrics

Telemetry & Cloud: Data engineering for 220+ log sources; Common Information Model standardizing field names/types across all parsed data; hands-on IAM policy/role implementation in AWS and GCP; event-driven serverless enrichment on GCP

Threat Intel & Investigation: Time-series anomaly detection of entity behavior (auth patterns, process chains) for investigation support; enriches alerts with CTI context (actor attribution, known-bad indicators) to speed triage

PROFESSIONAL EXPERIENCE

Senior Security Engineer — Shorepoint

Oct 2023 – Present

- Treasury SOC (TSSOC), Threat & Research team — team lead directing sprint priorities and technical direction for the Splunk-based detection and alerting content a live SOC runs incident investigations against.
- DOE/NNSA Security Data Integration (completed): built a new security data platform from scratch ingesting CrowdStrike, Suricata, and Zeek into Elasticsearch, plus the UEBA detection layer, custom dashboards, data transforms, and data-quality monitoring/alerting on top.

Senior Threat Detection Engineer & Data Scientist — Forescout

Aug 2022 – Oct 2023

- Senior member of the detection engineering/data science team building cloud-based big-data detection content and infrastructure against massive customer telemetry; threat intel sourced from Vedere Labs, Forescout's in-house research team, informed detection tuning.

Threat Detection Engineer & Data Scientist — Trend Micro / Cysiv

Sep 2018 – Aug 2022

- Architected and built a Python-based detection-as-code orchestration framework across nine SIEM/EDR platforms via native APIs — reusable per-technology adapters for every interaction method (rule management, alerts, tables, schemas) — with multithreading to deploy detection content across many customers in parallel inside a full GitLab CI/CD pipeline, including automated unit/integration tests and staged rollout before full production deployment.
- Built production GenAI tooling for detection-rule generation and cross-platform rule conversion; time-series anomaly detection on entity behavior (process chains, authentication patterns) to support investigations.
- Data engineering/pipelining for 220+ unique log data sources: 50+ Logstash filters, deployed Elasticsearch Beats for log collection, built a Common Information Model standardizing field names/types across all parsed data.

Security Data Scientist — Experian

Jan 2015 – Jan 2018

- Built DNS-based detection and mitigation for malware infections on the network; analyzed large-scale security log data to surface anomalous behavior.

EDUCATION & CERTIFICATIONS

M.S. Physics — University of North Texas (2013) | B.S. Physics — Ball State University (2011)

Security Clearances: Top Secret (current, Treasury) · DOE Q Clearance · Public Trust (DOE)

Splunk User Certification · Splunk for Analytics and Data Science
